

MANUAL TESTING

TEST1

Instruction: MOV A,#05

Initial CPU state:ACC=00

Expected Result: ACC should become 05

Actual Result: ACC =05

Status=PASS

TEST 2

Instruction: MOV R1,#03

Initial CPU state: R1=00

Expected Result: R1 should become 03

Actual Result: R1 =03

Status=PASS

TEST 3

Instruction: ADD A,R1

Initial CPU state:A=05,R1=03

Expected Result: A should become 08

Actual Result: A =08

Status=PASS

TEST 4

Instruction: INC A

Initial CPU state: A=08

Expected Result: A should become 09

Actual Result: A =09

Status=PASS

TEST 5

Instruction: ANL A,#0F

Initial CPU state: A=09

Expected Result: A should REMAIN 09

Actual Result: A=09

Status=PASS

TEST 6

Instruction: DEC A

Initial CPU state: A=09

Expected Result: A should become 08

Actual Result: A =08

Status=PASS

TEST 7

Instruction: SJMP 000B

Initial CPU state: PC=0009

Expected Result: PC should become 000B

Actual Result: PC =000B

Status=PASS

TEST 8

Instruction: HALT

Initial CPU state: CPU running

Expected Result: CPU should stop

Actual Result: CPU=HALTED

Status=PASS
